

Mr. Yuxiao Ye

yuxiaoye@bit.edu.cn | +86 18519112663

Research Interests: Deep Reinforcement Learning; LLM Agent; Text-to-SQL

EDUCATION

Beijing Institute of Technology (985 & 211 project university) **2022.09-Present**
MSc in Computer Science and Technology Supervisor: Prof. Chi (Harold) Liu, *FIET, FBCS* GPA: 3.6/4.0
Beijing Institute of Technology **2018.09-2022.06**
BSc in Computer Science and Technology Average Score: 88.6 GPA: 3.6/4.0 (rank: 7/56)
Core Courses: Mathematical Analysis (93/100), Probability and Statistics (96/100), Algorithm Design and Analysis (95/100),
Methods and Practice of Program Design (98/100), Data Structure (92/100), C Programming (94/100)

PUBLICATIONS

HONORS and AWARD

Grand Prize in "China Collegiate Computing Contest - AI Innovation Contest" (awarded 4/3400+) **2022**
National Scholarship **2023**
Outstanding Graduate Student, Beijing Institute of Technology **2023**
Outstanding Undergraduate Student, Beijing Institute of Technology **2022**
First-Class Academic Scholarship, Beijing Institute of Technology **2022, 2023**

RESEARCH EXPERIENCES

Research Assistant, Mobile Crowdsensing by Deep Reinforcement Learning **2021.06-Present**

- Proposed a multi-agent DRL framework, which consists of an intrinsic reward driven exploitation of agent’s individuality, enabling the accurate division of work, and a meta-learning based policy optimization, facilitating flexible cooperation modeling among agents.
- Proposed a multi-agent DRL framework, with a traffic flow prediction mechanism based on spatial-temporal transformer, and a graph-based inter-agent communication method, to achieve efficient path planning for agents.

Intern, SenseTime Large Language Model Group **2023.12-2024.04**

- Constructed a new Text-to-SQL benchmark to mitigate overfitting in LLMs, conducted comprehensive evaluations on five Text-to-SQL sub-tasks across six LLMs, identified the distinct capabilities and limitations of LLMs, and proposed optimal in-context learning solutions tailored to each sub-task.
- Proposed an LLM-based Text-to-SQL framework, consisting of an enhancement of in-context learning and schema linking, and a cross-consistency mechanism across different models, which **achieves new SOTA results on the Spider benchmark with an accuracy of 87.6%**.

COMPUTER SKILLS

Programming: Python, SQL, C/C++/C#, Java, Matlab
Software: Pytorch, Tensorflow, Hugging Face Transformers, DeepSpeed
